Tanja and Fabian come from kindergarten.
Both are friends.
They often play together and have a lot to tell each other.

Tanja played with the railway in kindergarten today
and Fabian with dolls.

Fabian visits Tanja.
They like to be together.
Fabian particularly likes Tanja's big teddy.
Tanja cuddles with her guinea pig.
She feels the soft, chubby fur.

Tanja lives alone with her mother.
The mother works and earns money.
Tanja goes to kindergarten early in the morning.
It's hard for her at times.
Often Tanja helps the mother with the housework or shopping.

Then her mother gets her work done faster, and both can play a little before dinner.
All children have a father and a mother.
But fathers and mothers do not always live together.

Before bathing, Tanja looks at her body.
She discovers her belly button and her nipples.
She sees a slit between her legs.
This is her cleavage and the entrance to her vagina.
Tanja's mother looks different!
She has breasts and nipples.
The entrance to her vagina is obscured by hair.
The mother also has hair under her arms.
If Tanja is big,
she will look like her mother.
She is then a woman.

Tanja lies in bed.
She snuggles up to her mother and reads a story.

Often the two also talk about experiences of the day and cuddle with each other.
Afterwards, Tanja falls asleep contentedly.

Fabian is busy with his
new bike.
The front tire suddenly has
no air.
He doesn't like that at all;
because he wants to cycle
with Tanja tomorrow.
That's why his mother
flicks the bicycle hose
before bed.
Fabian helps her.
Soon he can do it alone.

Fabian has a little brother.
His name is Torsten.
Fabian's father is
unwrapping him.
He plays with him.
It's a lot of fun for them.
Fabian is proud of his
brother.
Sometimes he wants him
gone and wants to be alone
with his parents again.

Fabian likes to bathe with his parents.
He, Torsten and his father look different from their mother.
They both have a penis.
It can become large and stiff.
When they touch it,
sometimes they have a nice feeling.
Behind the limb hangs the scrotum.
It contains the two testicles.
In Father's testicles, sperm grow.
The same will happen with Fabian when he becomes older.
His penis, too, will be as large as that of the Father.

The mother puts Fabian to bed.
He has his mother all by himself.
He cuddles with her and cuddles with her.
He tenderly caresses the mother and gives her many kisses.
Fabian's father feels unneeded.

Fabian knows how Torsten was born.
He remembers it well.
His mother said one day:
'I'm pregnant.
A child grows in my belly."

Fabian told Tanja straight away.
When she visited him,
she wanted to hear the baby in her stomach.
Fabian, meanwhile, felt at Dad's belly.
But men don't have children.
You don't get pregnant.

This is what Torsten looked like in his mother's belly. He was born soon after.

Shortly before the birth, Fabian's mother went to a hospital.
Now Torsten is born.

A midwife and sisters help the mother and Torsten.
Fabian's father can be present at the birth.

Torsten came out of the belly through the vagina.
That hurt the mother.
Soon this is forgotten,
and everyone is happy about Torsten's birth.

Torsten screams.
He must now breathe himself.
He is still connected to the mother by the umbilical cord.
The midwife is cutting through the umbilical cord.
That doesn't hurt Torsten.
Where the umbilical cord went into Torsten's belly,
he now has his belly button.

Torsten has just sucked milk out of his chest.
He enjoyed it.
He grabs mother's chest.

The skin is soft and chubby warm.
Torsten feels comfortable and safe.
Sometimes Torsten doesn't get fed up.
Then Fabian is allowed to give him the bottle.

Fabian's father and mother love each other.
They, too, like to cuddle with each other.
They caress each other all over their bodies and kiss each other.
They say lovely words to each other.
Sometimes they want to be all alone.
Then Fabian appears excluded and abandoned.
He is angry with his parents.

Fabian's parents also love each other in bed.
Father's limb becomes big and stiff.
Now the parents want to be particularly close.
Carefully, the Father puts his penis her vagina.
Both move up and down.
They have sexual intercourse.

When it is most beautiful, sperm flow through father's penis into mother's vagina.
The sperm cells can fertilize an egg in the mother's abdomen.
A child grows from the fertilized cell.
This is how Fabian and Torsten and Tanja and all the children came into being.

Fabian plays with his mother's pill pack.
His parents often want to have sexual intercourse.
But they don't want children anymore.
That's why Fabian's mother takes the pill.
Then the sperm cells cannot fertilize an egg.
And no child can grow in the mother's belly.

Tanja and Fabian are in the garden.
It's very warm.
They undress and spray themselves with water.
They both enjoy playing naked together.

The children came up with a fun game.
They play Doctor.
They look at and play with Fabian's body.
They are excited to be able to play.

Tanja and Fabian are on a construction playground. They bicker around a board.
Who will get it?

Tanja and Fabian like each other.
Tanja also likes Fabian's parents.
As a result, she notices less,
that her father does not live with her.
Tanja's mother and Fabian's parents visit each other
more often.
